

# AL NOOR CENTER FOR BLIND

# Al Noor Center for the Blind

## Inclusion & Empowerment

### Supporting Individuals with Visual Impairments

Since its establishment in 1998, Al Noor Center for the Blind has been dedicated to empowering individuals with visual impairments in Qatar. In 2018, a formal decision was made to expand the center, further strengthening its mission of providing specialized services to support and empower individuals with visual impairments.

## Our Vision

An institution dedicated to integrating & empowering individuals with visual impairments in Qatar.

## Our Values

① **Responsibility**

② **Privacy**

③ **Equality**

④ **Partnership**

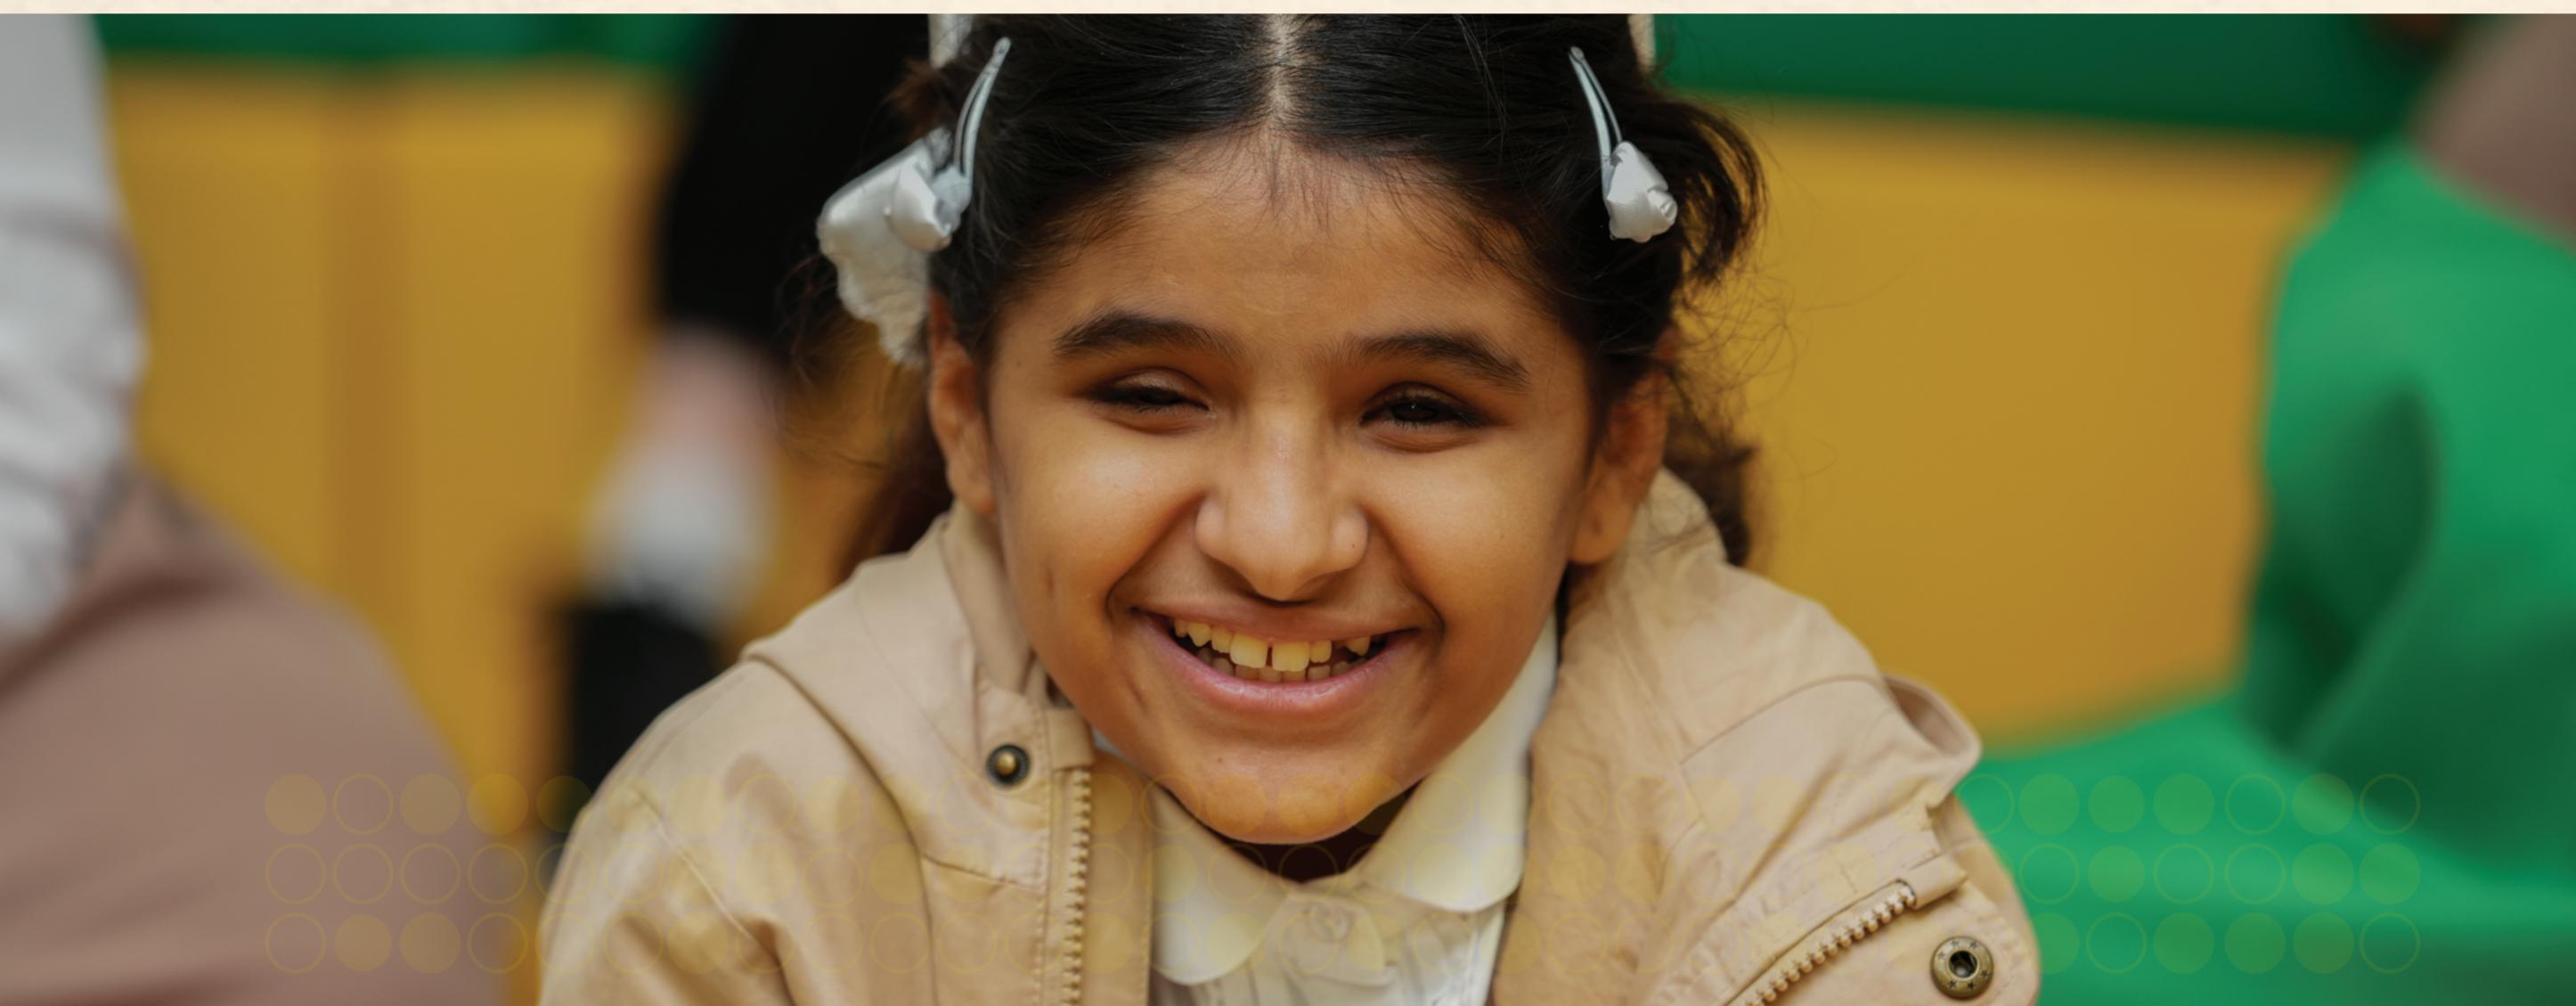

## Our Mission

To contribute to delivering exceptional services that enhance the quality of life for individuals with visual impairments, supporting their independence and integration into society.

## Our Services

We aim to provide specialized services that support and empower individuals with visual impairments, helping them achieve independence and fully integrate into an inclusive community.

**Services provided by the center through its various departments:**

### **Educational Services**

We provide educational and training services in the Arabic language for beneficiaries aged 3 and above, in addition to basic education.

Upon completing the sixth grade, they are transferred to mainstream schools across the country. The administration also implements several programs and activities to further support their development.

## **Beneficiary Services and Family Support**

This initiative aims to empower individuals with visual impairments within the community by offering exceptional services that foster their independence. Additionally, it provides crucial support to families, assisting them in caregiving and enhancing their overall quality of life. This is accomplished through Braille-based education and cutting-edge assistive technology solutions.

## **Medical Services**

A range of medical and rehabilitative services is provided to support individuals with visual impairments, helping them achieve their full physical and psychological potential.

## **Community Awareness**

This initiative is dedicated to raising awareness about individuals with visual impairments by developing and implementing educational programs, producing informative media content, and collaborating with specialized organizations to support their academic and professional growth.
